

CVCWG Update & Plans

Susan Bates

Co-chairs (alphabetically)

Susan Bates (NCAR)

Clara Deser (NCAR)

Peter Gleckler (PCMDI/LLNL)

Gerald Meehl (NCAR)

Shang-Ping Xie (Scripps)

Liaisons

Adam Phillips (NCAR)

Gary Strand (NCAR)

Simulations

Completed and Published

- CESM1-CAM5 decadal prediction hindcasts (Steve Yeager leading, yeager@ucar.edu)
 - 61 start dates (1954-2014) 10 years in length
 - 40 members completed
- CESM1 CAM-Chem (2° atm/lnd x 1° ocn/ice) (3 members ea.)
 - RCP6.0 – anthro. ozone precursors globally decrease
 - RCP6.0 – anthro. ozone precursors held at 2005 value
- CESM1 (LENS tag) Low warming scenarios (2006-2100)
 - Stabilize at 1.5° warming (11 members)
 - Stabilize at 2° warming (11 members)
 - Overshoot 1.5° and then stabilize (6 members)
- CESM1 1° (LENS tag) TOGA Ensemble – 10 members
 - ERSSTv3b, 1880-2016

Simulations Underway

- CESM1.3 fully coupled 1/4° atm/lnd coupled to 1° ocn/ice
 - 1850 PI control, 20th Century, RCP2.6, RCP8.5, and climate sensitivity runs
- Pacemaker simulations (CESM1.1)
 - Relax SST to idealized +/-/neutral states
 - Relax to time varying observations
- CESM1.1 (LENS tag) single forcing simulations (all-but-one)
 - 1920-2005, 2006-2080 following RCP8.5
 - All forcings except GHGs (20 members)
 - All forcings except anthropogenic aerosols (20 members)

Upcoming Simulations

- CESM1 high resolution atm/ocn (0.25° atm/lnd x 0.1° ocn/ice)
 - Long PI control
 - LENS-style 20th – 21st Century
- CMIP6 with CESM2
 - Flux Anomaly MIP (FAFMIP)
 - Detection/Attribution MIP (DAMIP)
 - Decadal Climate Prediction Project (DCPP)
