Welcome and Updates on PCWG Activities – PCWG Co-Chairs

David Bailey – NCAR
CCSM4 / CICE4 Update: When the Dust Settles

Elizabeth Hunke – Los Alamos National Laboratory
Update on CICE Activities

Stephanie Jenouvrier – Woods Hole Oceanographic Institute
Linking Demographic Models and IPCC Climate Predictions: Are Emperor Penguins Marching to Extinction?

Nicole Jeffery – Los Alamos National Laboratory
Some Impacts of Sea Ice Microstructure on Ice Algal Production

Ed Blanchard – University of Washington
Temporal Characteristics of Arctic Sea Ice in CCSM and Observations: Implications for Seasonal Predictability

Jen Kay, Kevin Raeder, and Andrew Gettelman – NCAR
Atmospheric Response to the 2007 Sea Ice Loss in CAM3.5 and CAM4

Steve Vavrus – University of Wisconsin, Madison
Future Cloud Changes in the Arctic: What’s Ice Got to Do With It?

Masha Tsukernik – NCAR
Atmospheric Influences on Fram Strait Sea Ice Export in Observations and CCSM

Andreas Muenchow – University of Delaware
Scales of Variability in Time and Space of Flows and Fluxes from the Arctic to the North Atlantic Oceans to the West of Greenland

Scott Elliot – Los Alamos National Laboratory
Marine Methane Cycle Simulations: Arctic Clathrates in the Global Warming Era

Bill Lipscomb – Los Alamos National Laboratory
The New Land Ice Working Group

Poster ads – Richard Grotjahn, Elizabeth Hunke, possibly others
Other Updates – Jonathan Bamber (Cryosphere journal announcement)

Adjourn
