CESM Breckenridge 2013
“A charge to working groups”

CESM2 (released 2016 for CMIP6)

1) What are the new science opportunities?
   - small scale phenomena
   - biogeochemical cycles
   - sea level rise
   - climate/human system interactions
   - near-term climate projections
   - (your idea here)

2) What are the biases that limit us from going after these opportunities?
