Climate Variability and Change Working Group Winter Meeting

(note: CVCWG meeting joint with WAWG/ChemClimate/CVCWG/ESPGW February)

**February 4th 2026
Damon Room**

** All times are MST; **Speakers:** please leave 5 min at the end of your slot for questions.*

Time	Topic	Speakers
09:00-09:15	Extreme Rainfall Events in Tanzania	Paul Limbu
09:15-09:30	From bust to deluge: How unusual was the 2020→2021 North American monsoon swing	Ariana Varuolo-Clarke
09:30-09:45	Separating circulation-driven and moisture-driven precipitation decline in Mediterranean-type climates	Robert Doane-Solomon
09:45-10:00	Local and remote impacts of large-scale agrivoltaics on climate and ecosystem responses	Mengqi Jia
10:00-10:15	Nowcasting the Climate: How well can we quantify when 1.5°C of global warming has been exceeded?	John Nicklas
10:15-10:30	Transition processes that end multi-year La Nina	Gerald Meehl
10:30-10:50	BREAK	
10:50-11:05	The response of CAM6 to bias-corrected historical ocean observations	Nathan Lenssen
11:05-11:20	Atmospheric response to various SST forcings: the role of nonlinearity	Dong Wang Kim
11:20-11:35	An interpretation of pacemaker experiments: insights from tropical Pacific-Atlantic interactions	Yusen Liu
11:35-11:50	Tropical Circulation Variance Response to Climate Change: Competing Influences of Energy Budget Variability and Gross Moist Stability	Zhenghe Xuan
11:50-12:05	Climate models exaggerate the impact of greenhouse gases on recent interhemispheric temperature patterns and tropical climate	Chengfei He
12:05-12:20	Sensitivity of Northeast Pacific Marine Heatwaves to Seasonality of Tropical and Local Dynamics	Tongtong Xu
12:20-1:20	LUNCH
